

1 **ABSTRACT OF THE DISCLOSURE**

2 The invention relates to a seat assembly for a motor vehicle
3 seat, comprising a seat frame, which defines a seating surface
4 for a motor vehicle occupant and pivotally mounted backrest,
5 which can be folded onto the seating surface about a pivoting
6 axis. According to the invention, the pivoting axis is
7 displaced along a predetermined path, when the backrest is
8 folded forwards onto the seating surface.
